Project Updates

Highland Dam Construction-

Two earthen dams are being constructed as part of the project which is aimed at keeping livestock from using Highland Silver Lake as a water source. The dams will create water sources away from the lake. At this time the southern dam is completed and completion of the northern dam is expected by early next week.

Koepfli Lane -

Baxmeyer Construction, the contractor on this project has completed two lanes of pavement from Sportsman Road tying the new roadway back into the existing concrete pavement on State Route 143. The contractor has also begun the grading and rocking for the 10' wide multi-use path. The placement of an asphalt overlay on Sportsman Road at the intersection with Frank Watson Parkway is planned for next week. An oil and chip surface is planned for the existing cemetery road and Raeber Road. This should also be completed within the next week. This entire project is scheduled to be completed by the end of the first week in December.

Iberg Road -

The contractor, Cox and Sons, has transferred traffic to the new Iberg Road. The old Iberg Road surface has been removed and they are currently in the process of grading the remaining roadway for the concrete surface that will tie back into the existing Iberg Road. The contractor is also in the process of pouring sidewalks along Iberg Road.

Oil & Chip -

The Street & Alley Division spent two days this week working to place oil and chip on some of the city streets. Next week, weather permitting, they will continue. They hope to finish up with the streets and address a few alleyways as well.

Hydrant Flushing -

The Water & Sewer Division will begin fall hydrant maintenance. During this time they will be flushing hydrants as well as doing maintenance work as needed on the hydrants. When the crews are working in your area you may experience low water pressure or discolored water. Allowing cold water to run through the tap after they finish in your area should clear up any problems, if not please call us.

Pavement Management -

Pavement inspections are continuing. All streets south of Lindenthal Avenue have been inspected. Sectors 3 & 4 are currently being inspected, those sectors cover an area between Broadway & Lindenthal Avenue.
